

PHOTOVISTA® PANORAMA 3.0 MAC FEATURES

Create 360° panoramas from a series of photographs

WHAT'S NEW IN PHOTOVISTA PANORAMA MAC (VERSION 3.0)

- Supports Macintosh® OS 9.1, OS X version 10.2.
- Ability to import a cylindrical QuickTime® 4 VR movie and convert it to a series of images then stitch them all together.
- 5.0 Java Viewers* provide better tile refreshing and support higher image sizes without tiles being dropped.
- Vertical stitching allows you to stitch 2 images together vertically to create a simple panoramic image, rather than the usual horizontal stitch.
- Auto-crop: After you perform a full stitch, you can crop the top and/or bottom areas of a panorama for cleaner edges. The cropping takes effect when you save, print or view a panorama.
- Manual stitch: When you stitch a 360° panorama, Photovista automatically attempts to wrap the outside images to complete the panorama. To fine-tune the wrap, you can adjust it manually.
- Support for Image Capture Architecture (ICA) Applications that directly support acquiring images from compatible devices such as digital cameras and scanners in OS X.
- Enhanced printing options: Printing across 2 pages and in landscape or portrait mode.
- Several new samples to choose from.
- Browser preview allows you to see your panoramas right in your browser in OS X.
- Publish function lets you upload your panoramas directly to a website. Options include: username, URL, password and panorama name.
- Preview thumbnails of unstitched images before you add them to your final stitch.
- Cool new User Interface. Even easier to use.

MAIN PRODUCT FEATURES

- Automatic warping, aligning and blending of images
- Automatic calculation of the number images to shoot for each lens type
- Create partial 180° or full 360° cubic, spherical or cylindrical panoramas
- Complete online help and manual
- Smallest possible file size means that files load quickly over any connection
- Support for all major camera lens types
- Manual lens creation: Create and save your own lens types
- Manual stitching and image overlap control
